UNIFORM CRIME REPORTS

J. Edgar Hoover, Director, Bureau of Investigation

United States Department of Justice

Washington, D. C.

Volume 1

NOVEMBER, 1930

Number 4

Contents of the November Bulletin.

This issue of the bulletin contains the usual table reflecting the results of returns on offenses known to the police received by the Bureau of Investigation for the month of November. Crime trends as indicated by the returns from contributing police departments are noted, the crime registration area reviewed, and tables showing the number of current and supplementary returns by States are shown. Current returns are those which were submitted for the month of November, while supplementary returns are those which were received since publication of the previous bulletin but which contain the figures for months prior to November.

"Offenses known to the police" include those crimes designated as Part I Classes of the Uniform Classification, occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be those most generally and completely reported: Felonious homicide, including (a) murder, nonnegligent manslaughter, and (b) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny—theft, including (a) thefts of \$50 and over, and (b) thefts of under \$50; and auto theft.

"Offenses known to the police" include, therefore, all of the above offenses which are reported by the police departments of contributing cities, and not merely arrests or cleared cases.

Crime Reporting Area Expands.

Police departments of 942 cities of the country contributed returns for the month of November. Of this number there were 68 cities from which figures were received for the first time. Current returns from the first and third divisions of Alaska and from Porto Rico were also received, while supplementary returns were forwarded from Alaska, Hawaii, and the Philippines. State police and sheriffs from a few States also submitted returns which are exclusive of the figures received from urban police departments.

As noted above the area represented by cities which have submitted returns during any one month shows gradual expansion. With the publication of this issue of the bulletin the total number of cities which

have at any time during the current year submitted returns reached 1,098.

In the following table the number and per cent of the cities and the number and per cent of the population represented are shown for those cities and towns of 25,000 inhabitants or more which have contributed returns for at least one month.

The classification is based on the 1930 figures issued by the Bureau of the Census. In addition to the cities contained in the chart there are 358 cities of a population from 10,000 to 25,000, with an estimated total population of 5,700,000, and 436 cities of a population less than 10,000, with an estimated combined population of 2,350,000 which have contributed returns. The population of the Territories and possessions which have reported at any time since January is estimated to be approximately 2,000,000.

Population groups	Total number of cities or towns	Cities filing returns		Total population (1930)	Population represented in returns	
		Number	Per cent		Number (1930)	Per cent
Total.....	368	304	83	49,681,812	37,619,965	77
A. Cities over 250,000.....	41	36	88	29,711,511	21,330,419	72
B. Cities 100,000 to 250,000.....	53	48	91	6,782,986	6,164,179	91
C. Cities 50,000 to 100,000.....	97	79	81	6,373,542	5,124,117	80
D. Cities 25,000 to 50,000.....	177	141	80	6,163,774	4,991,250	81

The above table does not include 794 cities of a population less than 25,000, aggregating a total of 8,060,000 from which returns are received.

Number of Current Returns Increases.

In the table on the opposite page is shown the number of returns by States received and published, exclusive of supplementary returns. It will be noted that the number of cities contributing current returns has increased from 399 in January to 942 in November.

Police departments of 143 cities of the country contributed returns for the month of November. Of this number there were 83 cities for which figures were received for the first time. Current returns from the last and third divisions of Alaska and from Porto Rico were also received, while supplementary returns were forwarded from Alaska, Hawaii, and the Philippines. State police and sheriff from 14 States also submitted returns which are exclusive of the figures received from urban police departments.

As noted above the returns reported by cities which have submitted returns during any one month show gradual expansion. With the publication of this page of the bulletin the total number of cities which

Supplementary Returns Requested.

Cities which have failed to contribute returns for each month of the current year are urged to do so. In this manner figures for the entire period from all contributing cities will be available. The Bureau of Investigation will be pleased to furnish the necessary forms for this purpose. In the table on the following page the total number of returns received for each month from January to October inclusive, 1930, is shown.

Total monthly returns including supplementaries

Monthly Crime Trend Chart.

The chart on the opposite page is based on crime returns submitted monthly from January to November, 1930, inclusive, by 58 cities of the United States with a population of 100,000 or more each, according to available 1930 Census Bureau data. The cities included in the chart have furnished returns on the offenses indicated for the above period. It is based on the average daily number of offenses for each month, and the crimes included are the offenses of the Part I Classes of the Uniform Classification of Offenses.

The chart does not represent trends for all contributing cities, but, as noted above, is based on the figures submitted for a period of 11 months by 58 of the larger cities of the country.

CHART OF MONTHLY CRIME TRENDS
FOR CITIES OF 100,000 POPULATION AND OVER
JANUARY TO NOVEMBER 1930

Robbery Increase Continues.

A comparison of the figures for October submitted by cities of miscellaneous sizes, with those submitted by the same cities for November, indicates that the number of offenses of robbery reported by those cities for November shows a moderate increase over the number reported for October. There was a slight increase shown in

the number of offenses of burglary—breaking or entering reported. The fluctuations in the offenses of aggravated assault, larceny—
theft, and auto theft were negligible, each offense showing a very
slight increase. Felonious homicide and rape were not included as
the figures received on these offenses are relatively too insignificant
to merit comparison.

The above treatment is confined to returns from cities which sub-
mitted figures on offenses known both in October and November,
and is exclusive of incomplete and defective returns.

Percentage Table of Part I Offenses.

The monthly per cent of each offense class to the whole is shown in
the following table. It is based on the total offenses reported by all
contributing cities, exclusive of defective and incomplete returns.

Per cent of offenses known

Part I classes of the uniform classification	Janu- ary	Febr- uary	March	April	May	June	July	Aug- ust	Sept- tem- ber	Octo- ber	Nov- ember

Annual Return Forms Distributed.

Forms B and C for the annual returns on offenses known and persons
charged respectively have been distributed to all officials who have
contributed crime statistics during the current year. Police depart-
ments contributing annual figures are requested to mail the forms in
the envelopes provided, on or before February 1, 1931. In the event
these forms have not been received by any department desiring to con-
tribute the information requested, please communicate with the
Bureau of Investigation and they will be forwarded immediately.

Unfounded Offense Defined.

An unfounded offense is one which upon investigation proved to be
groundless. In other words, the offense reported to the police depart-
ment or sheriff's office was never committed. The number of un-
founded offenses should be subtracted from the number of actual
offenses reported.

Cities Urged to Expedite Mailing Returns.

Police officials contributing crime statistics are urged to forward the
monthly returns whenever possible, on or before the seventh day of
each month. Prompt submission of the returns facilitates compiling
the data received.
